

Nest Bank

IT specialists outsourcing in body leasing model

Challenge

Nest Bank is a Polish bank which replaced the FM Bank PBP and its trademarks Bank SMART and BIZ Bank. Bank is offering services to both individual customers and micro-enterprises. An advantage of Nest Bank is its mobility. The Bank uses mobile applications for full access to the offer.

Case

Due to fast development, Nest Bank approached us with a request to support the creation of their back-office system. SolDevelo delegated several .NET developers to the client. They were involved in the development of new modules in existing applications.

Solution

Thanks to our support, the Nest Bank team develops projects in such areas as e-banking, data storage and system integration. All solutions were created in .NET technologies.

Technologies used:
