

SolDevelo's Case Study and Project Information

Product

TaroWorks™ is built on the powerful Salesforce platform and accessed in the field via Android devices. Its modular design is fully optimized around remote field operations management and business analytics needs. Salesforce offers a highly configured data structure, which allows the design of elaborate surveys and in-depth analytics around key areas of the customers' business.

Key Features

Performance

Manage individual and group performance, set goals, track progress, identify where additional support is needed.

Portfolio

Assign clients or projects to field staff, manage projects and teams.

Registering

Register a new client, project or entity.

Training

Deliver structured content (text, video).

Transaction

Capture POS orders, manage inbound – outbound transactions and inventory.

Monitoring & Evaluation

Integrate Social Performance Management tools including the Progress out of Poverty Index (PPI), measure and report your social impact performance overtime.
